Improve-it = Absolute Navetta 52

During the 2020 Dusseldorf boat show, Absolute presented the new 2020 version of the Navetta 52. Launched in 2016 the Navetta 52 has been a success for Absolute, now four years later to the launch of hull one the Italian Piacenza builder decided its time for an update. Most of the update in the new 2020 version comes from outside, with new large and different shape hull side windows, and a radar arch which looks back from the previous forward looking version, and this adding also a larger hard-top. These details will make it easy for people to recognize the new Navetta 52, 2020 and beyond version. But the changes do not stop there and for 2020 thanks to Volvo, the Navetta 52 will also feature the option of large Volvo 480hp engines. The standard options are still the same for Volvo's 435hp with IPS pod drives, while the interior layout is mostly unchanged with a three cabins two head layout below deck, and astern galley main deck.
