Project: Absolute Navetta 64

During the Dusseldorf boat show 2020, Absolute presented the project for a new Navetta 64, which will sit in between the 2019 Navetta 68 novelty, and the just redesigned 58 models. The Absolute Navetta 64 sees Absolute think out of the box for the lower deck layout, with an important option also revolving around the stern area, with an option for a Beach Club version. The Beach Club version will feature two fixed up glass water tight doors, which open to a cabin that can transform to a fourth cabin with sofa which transforms to a double berth VIP cabin with private en-suite shower head to port side. The lower deck layout of the Navetta 64 will feature as the other two bigger and smaller Navetta's a forward owner stateroom, with a midships VIP cabin to port side, and a third cabin to starboard. A crew cabin is located to starboard with a private entrance from the aft deck. The main deck with an astern galley will all be flush deck, with the exception for three steps leading up to the central twin seat pilot station. A lot of thinking also went in the Navetta 64 to increase the glazed surfaces area on the main deck and as the above rendering shows the side bulwarks are left open in order to increase the view from the interior and saloon dinette areas to the outside. The Navetta 64 will be powered by the large Volvo 900hp as standard and or optional 1000hp engines.
