

THE FIRST PICTURES OF NEW ABSOLUTE 58 FLY

BIG BOATS, PREVIEWS / BY MAGAZINE / DEC 05, 2016

She will be unveiled next autumn but we visited **Absolute's yard in Podenzano, Italy**, to take a look to the new enlargement (we'll tell

you it below) and take the very first pictures of **new Absolute 58 Fly**.

We were lucky since the boat (number 1) you can see in this article was ready to travel to the **Gold Coast Boat Show in Hong Kong**, where she will be presented in worldwide preview.

In Europe, on the contrary, she will be launched at next **Cannes Yachting Festival**.

Her particular **bronze colour**, too, as **Cesare Mastroianni** (Vice President and Sales CCO of Absolute Yachts) **told us**, is a trait of the boats destined to Far East.

The pictures we show you in this article are still a little “rough” since they depict a boat staying in the yard before her first sea trials. New Absolute 58 Fly is **17.24 m long, 4.8 m wide** and she’s pushed by two **IPS D8-800 Volvo Penta 625 HP engines**, launched in 2016.

Interior layout envisages **three stateroom double cabins, three bathrooms** and a **crew cabin** whose entrance is separated from the astern bridge.

We particularly liked the **high-quality finishes**, especially in the cockpit, the led lights, the **spacious flybridge** and the “boundless” extension of **glass surfaces**, in addition to the comfortable additional **fore cockpit**. Furthermore, Cesare Mastroianni showed us the **yard**, their exclusive **ISS** construction system which consists of a modern use of **wood and fiberglass** for structures and **the new wing of the establishment** (in the picture below).

“ It was necessary - told Mastroianni - both because of the number of orders we receive - the entire production of 2017 and even the first months of 2018 are already covered - and the growth in the average length of our boats”. This way, the production structure of Absolute acquires **7,200** additional square metres for a total surface of **24,200** sq.m.

Excellent the numbers communicated for the period between 2015 and the first 6

months of 2016: **+12%** in terms of employees, **+ 19%** as concerns the average size of boats and an increase by **51%** in turnover.
