BY SILVIA PRESTO NOVEMBER 8, 2022 5 MINS READ

A **new yacht** crowns the exciting last months of 2023 for Absolute Yachts, which has officially presented the **Absolute Navetta 70**: an **innovative** and **elegant model** that overturns the standards we have been used to so far, redefining the concept of "luxury" on board.

The new model fits into the "Navetta" range just below the 75-foot flagship, combining the **special features** of the shipyard's models with completely new **design** and **styling solutions.** The new Navetta stands out for its **originality**, architecture, design and attention to **detail**, which are taken to their maximum expression in this craft. The keyword chosen for the Navetta 70 is "**Allure**," in reference to her innovative, **modern** yet classical appeal, based on architecture.

The charismatic design introduces a **different direction** to the luxury yachting industry, but let us now see it in detail.

## Exterior Design

The Navetta 70 presents all the distinctive characteristics hallmarking Absolute Navetta yachts, such as the elegant open lateral gunwales, covered walkways, extensive glazing on main and lower decks. Added to this, however, are the many **innovative** elements that revolutionize the style of the Navetta 70: **dynamic** and **attractive exterior lines**, a **flybridge** and **cockpit** that are much wider than in previous models, and **fine finishes** that raise the level of elegance and luxury on board.

From the **cockpit** terrace (equipped with a third mooring station), a covered staircase leads up to the **flybridge**, which becomes even more important on this Absolute Navetta 70.

In this large upper area it is possible to enjoy moments of **relaxation** and conviviality with family and friends, taking advantage of the large **table** that can seat up to 8 people. The **hard top** can assume two different configurations: it can either be openable if one opts for coverage by a sunshade, or fixed if one prefers the integration of solar panels.

This second option is particularly relevant to Absolute, which has always paid considerable attention to **sustainability**, even to the point of integrating this issue into its corporate ethos, characterized by a deep love and respect for the marine environment. The solar **panels,** which are light, efficient, flexible, and resistant to the effects of salt water, are equally useful while sailing and during marina stopovers.

Moreover, the flybridge provides the owner and his guest with a plurality of comforts, from the forward helm station to a wet bar, outdoor galley, and the leisure area astern with designer **furniture** that can be rearranged to suit the occasion.

## Absolute Navetta 70: Interior

The **interior** of this new Navetta are design to excel: bleached timber in sophisticated shades ranging from white to grey and black, with rounded corners on the furnishing accessories, and bronzed details for sleek and glamorous looks.

The **elegance** and **comfort** of this yacht can be perceived in every corner, from the neutral and light colour palette to the solutions designed to offer maximum freedom of movement and luxury on board, such as very high ceilings, space-saving sliding doors and the minimal use of steps in the interiors. These styling innovations make the **spaces** of this Navetta feel like being on board a much larger superyachts, and to further embellish the rooms Absolute has thought of a **circular motif** that is taken up in almost every area.

This type of element is used from the ceiling decorations to the lighting fixtures, repeating it in different areas of the yacht to give **continuity** to the spaces.
The **large saloon** has a very large table, a fully equipped galley and large windows overlooking the aft terrace, creating a unique connection between inside and outside, without ever interrupting the connection and the allround view of the sea.

## Technical Specs

| | |
|---|---|
| VOLVO PENTA Engines | 2×D13-IP513350 / (2×735 kW) |
| LOA | 21,27 m |
