Project: Absolute 58 Fly

Absolute present the project for the 58 Fly which seems a follow up to the renovation phase as started in this 2016 year with the 50 Fly model. The 58 Fly will be also a replacement to the 56 series. The 58 Fly is an evolution of the Absolute design, taking cues from the larger 64 and 72 models and having the feel of a much bigger boat, see deeper walk around bulwarks and fore deck settee. Its main deck layout although similar to the 56 will offer also much more spaces see larger dinette, while the astern galley will be of a much open style. Below deck the Absolute 58 Fly will also offer a three double cabins three head layout, with the option of a crew cabin aft. Standard engine power will come from twin Volvo 600hp engines. Launching is scheduled for the first half of 2017.
